**Case Study: Vermont Flexible Trip Planner: Bringing Fixed and Flexible Transit Together on a Single Platform**

**Author:** Shared Use Mobility Center

The Vermont Agency of Transportation (VTrans), in partnership with Chittenden Solid Waste District and the Vermont Department of Public Service, launched the Vermont Demand-Response Service (VDRS) program. The project was conducted in partnership with the Vermont Foundation for Energy Efficiency (VFEF) and several public transit agencies across the state. The main objective was to provide a platform that enables users to plan their trips, guiding them to the most efficient and environmentally friendly routes.

**Case Study: COVID-19 Resource Homepage**

On March 11th, 2020, the World Health Organization declared coronavirus (COVID-19) a worldwide pandemic. The outbreak forced colleges, universities, and businesses to suspend in-person classes and activities, leading to a rapid shift to remote work and learning. The online platform was designed to provide resources and information to help navigate through the crisis.

*Status Updates:*

These status updates are part of SUMC’s ongoing effort to explore how cities and transportation sectors are impacted by the novel COVID-19 coronavirus. Subsequent status updates on the community’s impact on transit and shared mobility will be published as new information is shared.

MOD On-Ramp Program
Objectives

The MOD On-Ramp program serves as an incubator to develop innovative mobility ideas and to convert them into implementable (business) plans.

Participate in a community of transit agencies developing MOD projects.

Create practical knowledge and lessons learned to disseminate with the transit and mobility industry.
