On-Demand transit service on your smartphone!

Facebook/VTAFLEX  Twitter/VTAFLEX  •  #Flexmyride
Overview

VTA’s new Flex dynamic transit service pilot program rolls out early 2016 in a select area of North San Jose. Flex is a first- and last-mile “on-demand” connection service between regular transit stops and high-density employment centers, and areas that are hard to serve with fixed-route transit.

Cutting edge software was designed to automatically route the vehicles to pick up customers along a similar route of travel. Riders can request and pay for their ride with their smartphone when and where they need it. There is no fixed route or fixed schedule. VTA is using smaller, shuttle-like buses which are ADA accessible with room for two wheelchairs and two bikes.
